

# OSHIN, Oluseyi

ooshin@email.com | Winnipeg, Manitoba

## SUMMARY

- An Information Technology professional with over ten years' experience.
- Professional certifications in VMware, Microsoft, Cisco, Citrix and AWS Cloud solutions.
- Excellent troubleshooting, problem identifying and resolution skills.

## TECHNICAL SKILLS

- **Windows Server:** Active Directory, Remote Desktop services, DHCP, DNS, Group Policies.
- **Virtualisation:** VMware vSphere, Hyper-V, Citrix XenApp, Citrix XenServer. Linux KVM, P2V
- **Networking:** LAN, WAN, Routing and Switching, VLAN, IPsec VPN, SonicWall, NetScaler.
- **Linux Server:** NFS, NTP, SSH, Docker, Disk, FirewallD, File System and User management etc.

## PROFESSIONAL EXPERIENCE

### Senior Systems Programmer

Jan 2020 - Date

#### *Innovation, Transformation & Technology, City Of Winnipeg.*

- Deploy and support Azure Site Recovery cloud solution for protection and migration of VMware Infrastructure to Azure Cloud.
- Provision, manage and monitor VMware virtual machines used within the City of Winnipeg.
- Provide windows server operating system and Symantec Antivirus client support.
- Deploy and support Ubuntu Linux server operating systems.
- Provide SLA driven response to all events, incidents, and outages.
- Create and manage Windows active directory objects, Group policies and DNS records.
- Work with the network security team to ensure appropriate network access is granted to deployed servers and applications.

### Project Analyst/Architect

Nov 2019 – Jan 2020

#### *Oxygen Technical Services. Winnipeg.*

- Supported and managed customers' Active Directory, VMware and SonicWall firewall devices.
- Deployed and supported SonicWall and Cisco WIFI access points.
- Ensured Windows server and client operating systems are patched and up to date.
- Ensured clients' Veeam backup and recovery solution is functional.
- Developed scope and statement of work for the assigned projects.
- Provided level three support for client tickets.
- Supported and managed Kaspersky Enterprise Antivirus.

### Senior Systems Administrator

Oct 2018 – Sept 2019

#### *Inlaks Computers. Lagos.*

- Designed and led Windows server deployment on Azure IaaS cloud.
- Optimised existing Azure cloud server resources, reducing subscription bills by about 30%.
- Deployed a performance monitoring solution to enable the team proactively to identify and rectify server performance issues.
- Deployed and supported Red Hat Linux server operating system on Azure cloud.
- Provided technical support for Windows server 2008, 2012 and 2016 within the organisation.
- Managed the enterprise's public and private DNS records and SSL certificates.
- Led the successful migration of existing on premises server infrastructure to Azure cloud improving service uptime and availability.

**Senior Systems Administrator****Feb 2017 – Sept 2018*****Mainone Cable Company.***

- Deployed web application on AWS EC2 leveraging AWS autoscaling.
- Supported the deployment on client's Citrix XenApp server on the Mainone cloud platform.
- Supported the migration of client's on-premises resources to Mainone's Microsoft azure pack powered IaaS cloud platform.
- Deployed and supported Kemp Application Delivery Controllers for application load balancing.
- Deployed Citrix Netcaler SDX Application Delivery Controllers for SSL VPN.
- Successfully managed clients' cloud migration projects from design to delivery.
- Provided technical support for Windows server 2008, 2012 and 2016 within the organisation.
- Planned and supported the server memory upgrade of the Mainone IaaS cloud platform, increasing the memory capacity by 100%.
- Designed and supported the migration from end of life EMC VNX SAN to a Nimble ISCSI SAN.
- Designed and implemented Acronis Cloud Backup and Disaster Recovery.

**Senior Systems Administrator****Feb 2015 – Jan 2017*****Converge Global Concept Technologies Ltd.***

- Deployed Citrix XenApp on AWS cloud and deployed Netscaler for remote access.
- Led the design and implementation of Citrix Xenapp and XenDesktop solutions providing a secured remote access to users.
- Deployed Citrix XenDesktop using MCS and PVS image management servers.
- Load balanced the core banking applications for two national banks for high availability and resilience, increasing service uptime using Citrix Netscaler application MPX / VPX delivery controller.
- Supported a cluster of VMware ESXi servers that hosted over 600 virtual machines.
- Installed and configured Microsoft SQL server 2012 for Citrix XenApp and XenDesktop.
- Migrated web-mail email accounts to Office 365 for a client and provided on-going support to the users.
- Deployed and supported Citrix Sharefile collaboration software and XenMobile for mobile device management.
- Supported clients' Microsoft Active Directory servers and Kaspersky Enterprise antivirus.
- Provided SLA driven response to all events, incidents, and outages.

**Senior Systems Administrator****Oct 2013 – Jan 2015*****Business Connexions.***

- Deployed Citrix Netscaler MPX Application delivery controller for load balancing and optimisation of core banking application.
- Deployed VMware vSphere and vCenter for Server workload virtualisation.
- Installed and managed the Veeam Backup and Replication solution for VMware vSphere.
- Implemented a Microsoft private cloud using System Center 2012 R2 suite across two datacenters
- Successfully converted and migrated all Federal Inland Revenue Service's physical servers to virtual machines within the maintenance window, with zero data loss.
- Installed and configured Microsoft SQL server 2012 for Microsoft Virtual machine manager.
- Deployed SAN Storage technologies using ISCSI Protocol.
- Deployed and managed Microsoft threat management gateway 2010
- Provided SLA driven response to all events, incidents, and outages.

- Deployed VMware vSphere and vCenter for Server workload virtualization.
- Deployed Citrix Netscaler MPX / VPX Application delivery controller for web traffic load balancing and optimisation.
- Deployed Citrix XenApp and XenDesktop for application and desktop virtualization.
- Deployed Citrix XenDesktop using MCS and PVS image management servers.
- Installed and configured Microsoft SQL server 2008 R2 in cluster mode for Citrix XenApp.
- Configured profile management using a combination of Citrix profile management and folder redirection.
- Installed Citrix XenMobile for mobile device management.
- Deployed and supported SAN Storage technologies using iSCSI protocol.
- Deployed and supported Microsoft Active Directory, DNS and DHCP server.
- Deployed Cisco Call Manager Express as well as Cisco 2800 series Router and 2960 catalyst Switch for campus network.
- Provided SLA driven response to all events, incidents, and outages.

### **EDUCATION**

<b>Babcock University</b> , Nigeria.	Bachelor's degree Agriculture, Crop Science.	<b>2008</b>
<b>Imola Comprehensive</b> , Nigeria	High School Diploma.	<b>2001</b>

### **CERTIFICATIONS AND TRAININGS**

AWS Certified Solutions Architect - Associate	<b>2020</b>
Microsoft Azure Administrator	<b>2020</b>
ITIL foundation	In-view <b>(2021)</b>
Red Hat Certified System Administrator (RHCSA)	In-view <b>(2021)</b>
CompTIA Network+ Training	<b>2018</b>
CompTIA A+ Training	<b>2018</b>
VMware vSphere 5.1 Install Configure and Manage (VCP 5.1)	<b>2014</b>
Cisco Certified Network Professional (CCNP)	<b>2011 - 2017</b>
Citrix Certified Administrator for Citrix Netscaler 9 (CCA)	<b>2011</b>
Server Administrator on Windows Server 2008 (MCITP)	<b>2011</b>
Cisco Certified Network Associate (CCNA)	<b>2006 - 2017</b>
